

Ryan Reisdorf - Resume

PLACEHOLDER

This file is a stand-in so the download link on /resume works.

Replace it with a real export - see README, 'Regenerating the PDF':

1. Fill in `src/data/resume.ts` (it is the single source of truth).
2. Run `'pnpm dev'` and open `http://localhost:4321/resume`
3. Print to PDF (print styles already strip the site chrome).
4. Save over `public/resume.pdf`
